PARIS, le 25 février 1954

Dr. J. LEDERBERG
Department of Wisconsin
Madison, 6
Wisconsin

Dear Dr. LEDERBERG,

Thank you very much for your letter of 10 February. I am very interested in your work about the inducing of H antigen and I think that it is the right way to arrive to understand the classification of Salmonella. What you do in vitro, happened probably in the nature.

I can only send you the second paper of my study in the eggs. I have no more reprints of the first one. But you will find the description of the method in the second paper.

I will be glad to exchange in the future reprints with you.

Excuse please, my English, I am not sure that you know French. If that is the case, I will write in the future in French.

Mine sincerely

Dr. J. GRABAR
Chef de laboratoire
au Service des Vaccins

*I send you too a
reprints of the work
of one of the corner
in the laboratory.*
